THURSDAY, APRIL 25, 1894

BRITISH FARMERS ON CANADA.

Last year fifteen farmers from Scotland, England and Ireland, were sent to Canada to see and report upon its agricultural possibilities for the benefit of intending emigrants. They were all given a free hand, and were in no way restricted as to what districts they should visit—all that was desired of each being a free and independent report of his observations and conclusions. They have now all returned and made their respective reports. These it has been resolved to issue in a series of pamphlets throughout the various counties. It is said that arrangements have been made to distribute these farmers' reports or pamphlets broadcast among the farming community of Great Britain, and it is expected that the result will be the emigration to Canada of a class of men who will bring capital and industry, and help in the building up of the Dominion. There is such a remarkable unanimity in the reports that it is unnecessary to refer to more than one, and we shall select that of Mr. J. A. Davies, of Tenbury, Worcestershire, Eng., a farmer of great ability and experience.

Mr. Davies makes a very careful, conscientious and able report. In his opening remarks he says that, on the one hand, he feared lest any words of his should detract from or underestimate the enormous agricultural capabilities of the country, while, on the other, he felt his duty to warn his countrymen that if they failed to realize the hardships and privations of emigration to a new country the result was bound to be disappointment. He then proceeds to say that a farmer with \$5000 can do a good deal better with it in Canada than he can at home, and that the class of men who would benefit most are small farmers with families and some capital. To that class he zealously recommends the Dominion. There are many difficulties to be put up with he admits, the climate being, in his opinion, the greatest drawback, not so much on account of the severity of the winter as of its length. Mr. Davies writes very highly of the five experimental farms of the Government, and points out many ways in which they may be of value to settlers and new-comers. He minutely reports his visits to farms and estates in Ontario, Manitoba, British Columbia, and other places, and gives particulars as to crops, stock, etc. British Columbia will be ere long, he thinks, a formidable competitor to English hop-growers, as its soil and climate are suitable. So rapid is the growth of the hop-plant there that cuttings put in on May 20th of last year yielded on the occasion of his visit 800 pounds of hops per acre.

DOMINION PARLIAMENT.

The tariff items were further discussed in Committee of the Whole on Tuesday, the 17th. In speaking of reciprocity with the United States Sir John Thompson stated that the Government had made efforts to secure an arrangement, but had not been successful. Mr. Martin drew attention to the sentiment in the northwestern states on the reciprocity question. Mr. Davin and Mr. McDonald opposed Mr. Martin's views, stating that reciprocity would be of no benefit to Canada.

In the House on Wednesday, Mr. Davin again took up the debate on the North-West school question. He defended the enactments of the Assembly with respect to education, and explained the features of the law, holding that no injustice had been done to any class of the community. He contended that one system of education was necessary; if there were two systems, one would be wrong.

Thursday's session of the House was taken up by debating the question of examining witnesses under oath in connection with the investigation by the public accounts committee. The Liberals were defeated in committee on the point.

The rice, wheat and oatmeal duties occupied the attention of the House on Friday afternoon. Sir Richard Cartwright pointed out that the duty paid annually in Canada on rice amounted to \$200,000, while only seventy-five men were employed in the industry in the country. There was considerable discussion on the wheat duty. Mr. Martin favored acceptance of the reciprocal offer made by the United States, holding that it would be of great advantage to Manitoba farmers. The debate was continued at the evening session, and the duty will stand at fifteen cents per bushel.

Mr. Foster announced some further changes in the tariff. The tea and coffee would be changed so as to be admitted free from England, but not from the United States.

In the senate, Col. Boulton attempted to introduce a bill to construct the Hudson Bay railway on the public credit, but it was not allowed to be read, being irregular.

In reply to a question in the House on Monday, Mr. Costigan stated that \$436,345 had been spent in revising voters' lists under the Franchise act.

On a motion for a return of correspondence regarding the cattle embargo, a discussion arose, during which it was pointed out that the alleged cause of the embargo did not in reality exist. Manitoba and North-West cattle were now subjected to quarantine, and experts had shown that there never had been any tuberculosis in the province.

A discussion also took place on the reciprocity question. Mr. Charlton enumerated a large number of articles that Canada might exchange with the United States on a reciprocal basis without discriminating against England.

ON OUR WHEAT GRADES.

Toronto, April 21.—The grain examiners of the Board of Trade met yesterday to discuss the petition of the Winnipeg Board of Trade that they be allowed to fix the standards of Manitoba wheat. It is the opinion of many of the local grain men that the Winnipeg board should be allowed to make their own grades. The meeting adjourned, awaiting further information from Winnipeg.

A DECISION ON MONDAY.

LONDON, April 21.—At last there is something definite in regard to the cattle embargo. The Right Hon. Herbert Gardner, president of the Board of Agriculture, promises to announce on Monday the decision of the Government in the matter. It is believed on good authority that a conditional removal of the restrictions for six months has been agreed upon.

Mr. Alexander Asher, M.P. for Elgin, Scotland, gave notice in the House of Commons last night that he would call the attention of the Government to the importation of foreign cattle and move a resolution in that connection.

In the House of Commons, Col. Howard Vincent, M.P., referred appreciatively to the provision in the Canadian tariff preventing the importation of prison-made goods, and asked Mr. Mundella, president of the Board of Trade to introduce a similar provision here.

Itch on human and horses and all animals cured in 30 minutes by Wolford's Sanitary Lotion. This never fails. Sold by C. E. Cartlew, Qu'Appelle.

DEATH.

HARVEY.—On the 24th inst., at Qu'Appelle, Alexander Harvey, in his 73rd year.

"MUSIC AND SONG."

Rev. A. Fowler, B.A., delivered his lecture on "Music and song" before a numerous gathering in the Town Hall on Monday evening last.

Mr. Rothwell, of Regina, was voted to the chair, and prior to introducing the lecturer called for a pianoforte duet, which was ably rendered by Mrs. W. L. Clarke and Miss B. Scott.

Mr. Fowler commenced his remarks by stating that the gift of song was God's great gift to mankind, and traced its history from the creation of the world. It is a humanity from the finite to the infinite; from the world material to the world spiritual, and was allied to the highest part of man's nature. All men were endowed with a susceptibility to music, the nurse employed it to soothe the child to sleep, and its marvellous power had often been demonstrated on the battlefield, when the almost vanquished forces were by its influence inspired with fresh courage to renew the fight and overcome their enemies. The itinerant musician forgot all his troubles and was lifted out of his dependency as he manipulated his violin, in illustration of which the lecturer sang "Fiddle and I." Music had a wonderful influence over the home circle, the sick, the criminal and the felon. The music of the sanctuary was dealt with, the lecturer stating that there were 400,000 hymns, printed in 200 different languages, forming a grand heritage which ought to be better appreciated. The devil got too much of the finest music in the world and God got too little. In many ways they were a hundred years behind the times, and the training of children to sing was much neglected. The conduct of some grown people who could sing, and others who thought they could, was criticized, and their errors pointed out. Mr. Fowler sang several pieces during the evening, and closed his remarks by giving expression to some thoughts on the songs of the Bible.

Later in the evening, the company partook of refreshments which were served in the upper room. The entertainment was under the auspices of the Ladies Aid of the Presbyterian Church.

TO PROTECT CHILDREN

The Good Work of the Children's Aid Societies.

PARENTS MUST DO THEIR DUTY.

Or the Law Will be Put in Operation.—Foster Homes Instead of Institutions for Homeless Children.—A Sister as Well as a Brother System.

The first report of the superintendent of neglected or dependent children of Ontario makes a new and most important work of the province. It means that hereafter the state in addition to providing for the care of the neglected or dependent child, will also seek to stay the stream of crime by giving timely aid and recognition to child-saving work. Nurtured in the good work of the state, the child will be able to grow up as a citizen, and not as a vagrant and a source of trouble and insecurity. Hereafter it is proposed to encourage, on the part of the philanthropic public, more attention to the claims of the children. As the Hon. Joseph Chamberlain said recently, in a speech endorsing the work of the English Society, "The helplessness of these little ones, their dependence upon others,

HOW SHE LOOKED AFTERWARDS.

"mother." There is no better service anyone can render to church or state than the training of a child for good citizenship. It is a noble task and worthy of even some trials and disappointments.

THE SOCIETY GIRL.

The society girl is popularly supposed to belong to the butterfly order of women. Her sisters, less fortunate than she, who have to toil and spin, fancy her a radiant being with heaps of beautiful clothes to wear, unlimited money to spend, luxurious food to eat, and passing her life in a whirl of delightful engagements. Sometimes they speak of her in a cynical manner, meaning that in her life of pleasure she is idle and selfish, absorbed in that which can give her gratification and minister to her vanity.

The young woman plodding along patiently day by day through rain and sleet to her place behind the counter thinks of the society girl at the same hour making her leisurely toilet, and if the former be weak and silly, she feels a slight pang of envy as the contrast in their lives presents itself to her mind. She feels that the life of this other girl, for whom everything is done, and who may buy what she chooses.

In point of fact, there are few people busier than the society girl. In the first place, it is no light task to keep up a wardrobe such as one needs who is perpetually going to luncheons, dinners and receptions. One or two gowns in a season are not enough; there must be bewitching changes for numerous occasions. Every costume must be made to order, and the society girl, like a butterfly, is always changing her dress, her shoes, her gloves, her fans, ribbons, lace, flowers, and what not. The slightest carelessness in the details of a beautiful costume may ruin its effectiveness. All fathers are not equally lavish, and all society girls do not possess the same taste and commensurate with their wants. Some of them have to skimp and plan in a way that is very trying. Possibly the other girl, whoever she is, would not wish to change places if she were behind the scene.

The society girl's life, even if she be the strictest of dutifuls, implies a certain amount of devotion to classes of various sorts, which are fashionable if they are nothing else, and they are a great deal. Browning, Shakespeare, and Tennyson the girl must have at her fingers' ends. She must have a knowledge of the classics, and on hand plenty of the small change of conversation, must understand classical allusions, and must be able to hold her own in the lathered and shuited of gay talk which goes on among clever people. All this makes study and application essential to some extent.

Whatever fails her, however, the girl must have her white hand in it. Whether or not she likes cards, she must at least have a knowing acquaintance with the scientific game of whist, though she will be wise to abstain from that intellectual amusement unless she can hold her own to the satisfaction of her partners. A stupid whist-player in society is a decided bore, not accepted serenely by any means.

It goes without saying that the society girl keeps up her music. If she does not herself play, she at least understands what is going on, and hears the best singers and players, and has her enthusiasm for which she is ready to do battle valiantly.

As there are but twenty-four hours in the day, one must be alert in order to keep up with everything which the social life of a society girl entails. Her day is a constant succession of tableaux given in aid of an orphan asylum or a fresh air fund, must be her part. She is not without interest in art and festivals, and often as manager of an institution or member of a benevolent association she is pledged to raise a liberal amount of funds necessary to carry them on. To do this requires an immense amount of ingenuity, exertion and personal magnetism.

In her club or clubs she prepares and reads papers, takes a hand in discussions, is responsible for a share in whatever the club has on hand.

"TILL WE MEET AGAIN."

An Incident Connected With the Sailing of the Germanic.

Although the swift ocean racers make a trip across the Atlantic only a matter of about six days, and their great size and strength add so much to the comfort and safety of the voyage that nowadays it is considered an easy and pleasant thing, still the ferry is a long one even yet, and there is enough danger and uncertainty left to make the sailing of every vessel an important event.

The other day the big ocean liner Germanic, of the White Star Line, lay at her pier in New York harbor, just before 11 o'clock, waiting for the signal to start. There was the usual crowd of oncoming passengers, porters hurrying with trunks and parcels, and the usual bustle of the ship. The Germanic was a big ship, and she was to be seen by the oldest brother of the Emperor of Austria, and promises to be an important affair. Some five hundred papers by foreign delegates are already scheduled for presentation. Most of these are on hygienic topics.

A present of a hundred repeating rifles and eight thousand cartridges has just been made by the Austrian Ministry of War to the Red Cross Association, which has started a Red Cross colony in Africa to preach and practise the brotherhood of man.

An international exhibition of the book and the pen is to be opened in Paris in July next. It will comprise the various branches of the manufacture of books and paper, as well as the machinery, implements, and material used in printing and illustrating books.

The Austrian army, at the close of 1902, consisted of 1,044,000 privates and 26,000 officers of all ranks; the navy of 650 officers and 21,000 seamen. There were nearly 500 cases of suicide and attempted suicide in the army and navy during the year.

Beauty competitions have lost their charm in Europe, and a variation of the idea is under way in Belgium, where an ugly man exhibition, to be held in Brussels shortly, is being worked up. A subcommittee of the competition will vanquish all comers by the hideousness of his countenance.

Nearly 36,000 tons of tobacco are annually consumed in France, according to recent statistics. Of this some 29,000 tons are used for smoking, 1,250 for chewing, and the remainder for other purposes. This is an increase of 7,000 tons over the consumption of twenty years ago, but there has been little change in the last ten years, except that the quantity of snuff used is gradually decreasing. Nearly 100,000 tons of tobacco is consumed in Paris and its suburbs.

A remarkable success of a new submarine boat built for the Italian Government is alleged in reports from Spezia. At the official trial there several weeks ago two Vice-Admirals and several other officers were on board, and were about to start the boat immediately disappeared under the water, and thus traversed the entire length of the gulf, returning to the surface in close proximity to the training ship Maria Adelaide, against which it feigned to discharge a torpedo.

A prize of \$5,000 is offered by Court O'neill Davidson for the discovery of a remedy perfectly certain to cure or to protect horned beasts against cattle plague. The award of the prize is in the hands of the Curator of the Imperial Institute of Experimental Medicine of St. Petersburg, and the competition is open to the whole world.

The Paris Lyons Railway Company has followed the recent lead of the Paris-Havre company and initiated the use of electric power in its suburban trains. The former company has decided to abandon steam as a motive power. The express trains of the Lyons company to Nice are now run by electric engines. One novel feature of the engines is that the entire force is supplied by a single engine.

LATE FOREIGN NEWS

Now Spain is organizing a world's fair which, under the title of the Madrid Universal Exhibition, is to be opened in the capital at the end of May.

There has been a great decline in the shipping industry since the outbreak of the war. In 1901, for instance, the aggregate tonnage, steam and sail, of 31,133, in 1901 to 15,376 tons last year. The total tonnage of sailing ships built in 1901 amounted to 14,267 tons; last year it was but 3,789 tons.

A congress of Hygiene and Demography is to be held at Budapest early next September. It is to be opened by the eldest brother of the Emperor of Austria, and promises to be an important affair. Some five hundred papers by foreign delegates are already scheduled for presentation. Most of these are on hygienic topics.

A TERRIBLE EXPERIENCE.

EIGHT LONG YEARS OF PAIN AND SUFFERING.

A Well Known Godefrich Lady Restored to Health—Strength After Prolonged Suffering—Her Experience for the Public Good.

The marvellous change which has taken place in the physical condition of Mrs. Cullen Fraser, Britannia street, during the past twelve months, has been the chief topic of conversation among her many friends and acquaintances of late, and to all who know of the terrible manner in which she has been afflicted, her recovery appears to have been little short of miraculous. Mrs. Fraser has a wide circle of acquaintance in Godefrich and vicinity, having resided in that town for over thirty years—ever since her husband, who was a merchant in Bayfield, retired from business and located here. Having heard of the wonderful change that had been brought about in the physical condition of Mrs. Fraser, a representative of The Signal, a local paper, was sent to her pleasant home to congratulate her on the improved state of her health, and to find out in what manner the happy change had been effected. He was graciously received, and the following statement was voluntarily given by Mrs. Fraser:

"It is now over eight years since one morning as I was performing ablutions, and when passing my hand over my face, I experienced a pain on the cheek similar to that which is felt when a thorn which has penetrated the flesh is being withdrawn. The pain continued after that and appeared to move all over my face and head. From the cheek it went to the upper lip, then to the lower lip, then to the forehead and head and then to the eyes. No intense was the agony which I suffered that I was unable to touch my hair and eyebrows, and my eyes felt like veritable balls of fire. My gums were so affected that I was unable to masticate my food, and I suffered greatly from lack of nourishment. My face became so contracted from the effects of the pain that my best friends could hardly recognize me, and the only relief I could get was from the use of opium. Finally, my local physician, who had been tireless in his efforts to help me, and he could do nothing further for me, and my case seemed utterly hopeless. I then went to Clinton and consulted one of the most skilled practitioners in the city, who, after a long case and said he could recommend no treatment that would benefit me. I came home utterly broken down and not knowing what to do. I had read in the newspapers of the marvellous results accomplished by the use of Dr. Williams' Pink Pills, but I had never placed much confidence in proprietary medicines so widely advertised, and had relied more on the methods of skilled practitioners. I had not given the matter much thought, but I determined to give Pink Pills a trial, and had two boxes purchased at the drug store of James Wilson. From the first box I cannot say I experienced any noticeable benefit, but I felt a relief in the turn of the tide, and the second box I knew I was mending rapidly, as the terrible pains had ceased, to a great extent, and I had begun to feel more like my former self. That was rapidly followed by the third box, and I was recovering their leg to step in rapidly and congratulate me. As a result of the experience consequent upon the fact that sometimes as many as ten or a dozen would come in to see me during the course of a day, I had a relief of the turn of the tide, and I continued to take Pink Pills, and as pleased to say that I gradually got back to my normal condition, in which I am to-day. This summer, since August, I have been entirely free from the malady, which has never been the case during the previous seven summers, but I occasionally take the Pink Pills, as my doctor advises me that it is well, so as to ward off the disease. I attribute the marked improvement in my health solely to the use of Dr. Williams' Pink Pills, and have not failed to recommend their use to many of my friends who have made enquiry as to the benefit derived by me from them."

In conversation with Jas. Wilson, druggist, it was learned that Dr. Williams' Pink Pills have a very large sale in Godefrich, and that many can testify to their great value as a blood builder and nerve tonic. Mr. Geo. A. Fear, druggist, also speaks highly of the results attained by the use of Pink Pills among his customers, and says he finds them the best selling remedy in his store.

Such remarkable cures as that of Mrs. Fraser have been but too few in the past. Thanks to the better knowledge that the people are obtaining of Dr. Williams' Pink Pills they are now becoming more numerous.

This medicine contains in a condensed form all the elements necessary to give new life and richness to the blood, and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, senility, neuritis, rheumatism, nervous headache, the after effects of a grippe, palpitation of the heart, pale and sallow complexion, that tired feeling resulting from nervous prostration, all diseases depending upon vitiated humors in the blood, such as scrofula, chronic rheumatism, etc. They are also a specific for troubles peculiar to females, such as suppression, irregularities, and all forms of weakness. In men they effect a radical cure in all cases arising from mental worry, overwork, or excesses of whatever nature.

Dr. Williams' Pink Pills are sold only in boxes bearing the firm's trade mark. They are never sold in bulk, or by the dozen or hundred, and any dealer who offers substitutes is unwelcome.

Dr. Pierce's Peppermint Cure permanently cures all cases of indigestion, flatulency, indigestion and kindred ailments.

Over 1,000,000 Frenchwomen were made widows and 3,000,000 French children were made fatherless by Napoleon's campaigns.

Corn Sowing
Is a process conducted by the agency of tight boots all the year round. Corn reaping is conducted through the agency of Putnam's Patent Corn Extractor, the only safe and sure corn cure. Putnam's Extractor is now widely imitated. Beware of all poisonous and sore producing substitutes; they are dangerous to use and are sold simply because they afford the dealer larger profit.

to us in this form should be avoided. The public are also cautioned against other so-called blood builders and nerve tonics, put in a similar form intended to deceive. Ask your dealer for Dr. Williams' Pink Pills for Pale People and refuse all imitations and substitutes.

These pills are manufactured by the Dr. Williams' Medicine Co., Brockville, Ont., and Schenectady, N. Y., and may be had of all druggists or direct by mail from Dr. Williams' Medicine Co. from either address, at 50 cents or six boxes for \$2.50.

Warning to Young Men.
She: "No. I like you very much indeed, but I can never marry a spendthrift."
He: "How do you know I am a spendthrift?"
She: "By the way you have been wasting money on me."

RECIPE.

For Making Root Beer.
During the summer months a more delicious drink than Root Beer could not be desired. For the benefit of our readers we give this recipe. Take
Yeast 1 lb. half a cake
Sugar 4 lbs.
Lime warm water 5 gallons.
Dissolve the sugar and yeast in the water, add the extract, and bottle, place in a warm place for twenty-four hours until it ferments, then place on ice, when it will open sparkling and delicious.
The Root Beer Extract can be obtained at all Grocers' and Drug Stores, at 25c. per bottle.

To be perfectly proportioned a man should weigh 210, for every foot of his height.
Do you use Wide Awake Soap? If not, why not? It is guaranteed absolutely pure and is the best in the world.

Nerve Pain Cure.

Polson's Nerve Cure cures rheumatism, and spasms, Nerve cure cures vomiting, diarrhea, colic, and dysentery. Nerve cure cures headache, sea sickness and summer complaint. Nerve cure cures neuralgia, toothache, lumbago, and sciatica. Polson's cures sprains, bruises, cuts, etc. Polson's Nerve Cure is the best remedy in the world, and only costs 10c and 25c per bottle. Sample and large bottles at any drug store. Try Polson's Nerve Cure.
The Thames pours forty million cubic feet of water into the sea every hour.
Wide Awake Soap is a solid bar of pure soap that will not vanish like snow in hot water. Try it.
The plum-pudding was unknown in England until the middle of the last century.

A Toronto Coroner's Verdict.

Dr. W. A. Young, Coroner, 145 College St., Toronto, writes that he has used St. Leon's Water very largely in his private practice, and can endorse it as one of the best saline waters at present on the market and positively curative in its effects. Sold by all principal druggists, grocers and hotels.
Plaster of Paris, mixed with an equal portion of oatmeal, and a small quantity of sugar, soon settles cockroaches.
Good morning, Mrs. Smith, I have just finished my washing, using Wide Awake Soap. It is the best I ever used; it washed so easily making the clothes far cleaner than I ever had before, and it lasts twice as long as any other soap I ever used; and just feel how nice and soft my hands are.

A. P. 706.

CURE THAT THE BEST!

COMBOS IMPROVED
Have all the latest improvements. Be sure and get one for your buggy. They are better than ever for sale.

SHEET STEEL BRICK
ABSOLUTELY FIRE PROOF. METALLIC ROOFING CO. 155 YONGE ST., TORONTO.

GRANBY RUBBERS
They give perfect satisfaction in fit, style and finish, and it has become a by-word "GRANBY RUBBERS wear like iron."

SCIENCE DUMBFOUNDED.

A Cure at Last for That Terrible Disease Sciatica—A Sufferer From Rheumatism Healed.

A very interesting case from a medical standpoint is that of Joseph Henderson, of Markham street, Toronto. Mr. Henderson's story is this—Seven years ago he was employed lumbering in the Parry Sound district. Last spring he was rafting and river driving, and the weather and the constant workings he got in the river proved too much for his system and acute rheumatism set in. For three months of the year he was hardly able to stir out of bed. His joints were swollen and inflamed, and the pain he suffered was frightful. One moment his arm would be tortured, then the pain would shift to his chest, another time it would be his legs. The doctors did all they possibly could for him, but to very little purpose. Finally the disease settled in his right leg and he was lame. The doctors said he had sciatica, and he was unable to move about without the aid of a crutch. Every spring he suffered from an attack of acute rheumatism and often had to be confined to his bed. This spring he had an unusually severe attack. Some of his friends advised him to try a remedy that has been effecting some wonderful cures for rheumatism, called Schiller's Sarsaparilla. He took one box and noticed a marked improvement. The interesting pains across his chest and in his legs left him, with the second box, and after taking six boxes the pain left his leg and for the first time in seven years he has been able to get about without the aid of a stick or crutch. He says Schiller's Sarsaparilla has completely cured sciatica and rheumatism in his case, although the doctors said he could not be cured. Several of his friends have been taking the remedy for rheumatism with wonderful effects. Sold by all druggists or sent post-paid at 50c. per box, six boxes for \$2.50 by addressing H. K. Schiller & Co., 73 Adelaide St. West, Toronto.

NO USE Denying There is no Remedy the equal of St. Jacobs Oil for the Prompt and Permanent Cure of Pains and Aches
St. Jacobs Oil is a pure Cod Liver Oil, with the Hypophosphates of Lime and Soda. A feeble stomach takes kindly to it, and its continued use adds flesh, and makes one feel strong and well.

Town & Country Gullings.

—Mr. W. Childs, Regina, was in town on Monday.

—Mrs. Empey, mother Mr. A. S. Empey, is visiting here.

—Mr. Ale Craig arrived from his trip east on Tuesday morning.

—Mr. R. Johnston returned from his trip east on Tuesday morning.

—Mr. Boone (Boone and Miller), Indian Head, was in town on Monday.

—Messrs. Barnes and Lascelles have gone to the lakes on a shooting expedition.

—Mr. W. Dunlop, rancher, near Fortin, has disposed of his farm here to Mr. John Booth.

—President Van Horne, of the C.P.R., will come west next month, on his annual tour of inspection.

—Seeding is now in full swing and will be completed in a few days, should the fine weather continue.

—The train from the east on Friday morning was five hours late in arriving at Qu'Appelle, the delay being caused by snowstorms east.

—Between the first and fifteenth of this month over 350 immigrants and 67 carloads of settlers' effects have come into northern Alberta.

—The Superintendent-General of the Indian Order, the Rev. Father Sault, has been in the city from Regina, and will visit the Mackenzie River district before returning.

—Mr. Redwell, Inspector of Schools, is at present in Qu'Appelle, attending to his duties. After having completed his work here, he proceeds to Indian Head, thence to Weyburn.

—Salamanca has been created an unincorporated town under the title of the "village of Salamanca," and an election was held on Monday week last of an overcast. Grenfell has also been created an unincorporated town.

—Miss Lillian Phelps, honor graduate of the National School of Oratory, Philadelphia, will lecture in the Methodist Church on Thursday evening, May 3rd, under the auspices of the W.C.T.U. All are invited. A collection will be taken to defray expenses.

—North-Westers continue to grow old hard times and the country's misadventures, but when they read the accounts of how people in other parts of the world are being persecuted with troubles and disasters they should keep quiet and be thankful that they live in the North-West.

—Mr. Goggin will conduct a teachers' institute at Weyburn, on Friday and Saturday. He will discuss school government and the teaching of literature, composition, and history, and deliver a lecture on the evening of Friday. The names and addresses of all teachers present are to be sent to the Council.

—Manitoba experienced a heavy snowstorm on Thursday last. It was one of the worst ever experienced. The Stonewall train from Winnipeg found the line submerged about eighteen inches under water, and not being able to proceed, had to return to the city. At the same time they were enjoying beautiful spring weather in Qu'Appelle.

—Mr. Jas. Scott arrived home on Friday morning. Mr. Scott went as far south as Texas, returning through San Francisco, visiting the Midwinter Fair, from thence by rail and boat to Vancouver, and from there by C.P.R. home. Mr. Scott says he has seen lots worse places than Qu'Appelle in particular and than the Canadian North-West as a whole.

—The services conducted by the Rev. F. W. Auvache (Baptist minister, of Regina) in McLane's Hall, on Sunday, were well attended. A large number of members of other churches were present in the evening, and the hall was packed to its utmost limits. The new gentleman gave a lucid interpretation of the 47th verse of the 5th chapter of St. John.

—We notice by the Winnipeg Free Press that Mr. H. C. Lawson, of Regina, who is at present under the care of Dr. Good suffering from the recent accident to his eye, will lose the sight of one of his eyes, but that every hope is entertained that the disease will not communicate itself to the other. Mr. Lawson's many friends will rejoice to hear that the injury may not prove so serious as was at first feared.

—According to the Whitewood Herald the Arabian Doctor (?) and his companions did not prolong their journey to the coast and back as intended, as they returned east from Moose Jaw on Sunday, 15th ult., their prospects of a successful business after their experience of Regina and Moose Jaw not seeming bright enough. How about those to whom the money was to be refunded on their return journey if their medicine did not perform all that it was guaranteed to do?

—Mrs. Frank Marwood is visiting Mrs. G. H. V. Bulley.

—Dr. Kemp, Indian Head, was in town on Friday last.

—Doctor Bell was in town on Saturday and Sunday last.

—The Red River is rapidly rising and fears of a flood are entertained.

—Doctor Guerin, dentist, White-wood, was in town last week for the practice of his profession.

—A sweepstake running race for \$30, distance one half mile, between three local horses, is to take place on Saturday, the 28th inst.

—Mr. Whyte says that the summer time table will be practically the same as last summer, and will go into effect about the 1st of June.

—Gen. Superintendent Whyte and Superintendent Milestone were in town on Friday making arrangements for the erection of the new C.P.R. station.

—The Grand Challenge cup and medals won by our curlers at Regina have arrived, and are on view at Mr. Beauchamp's store. The cup is indeed a very handsome one; the medals are also pretty.

—Mr. Rothwell expresses himself as being very much satisfied with the state of education in our public school, and gives unstinted praise to both Mr. McCannell and Miss Middleton, the teachers.

—The bill respecting the Wood Mountain and Qu'Appelle Railway has passed the railway committee. It authorizes the company to commence its road before 30th October, 1894, and build twenty miles annually thereafter.

—Moose Jaw is becoming either the dumping ground or distributing centre for Chinese. They have been landed off the Atlantic express until every available room in the town is packed like a sardine box. It is suggested that a quarantine office be placed there for the protection of the town.

—Accidents never occur singly. Mrs. Handyside was driving home on Thursday evening last when the axle of the buckboard broke close to the arm, capsizing Mrs. Handyside on to the prairie and breaking one of her fingers. It is but a few weeks since Mrs. Handyside fell and broke her collar bone.

—Mr. Alexander Harvey, father of Mrs. Milne and Mrs. Doctor Carthew, died rather suddenly on Monday night. He had been rather frail for some time, but such a sudden decease was not expected.

—Mr. Harvey was a native of Kinnetles, Forfar, Scotland, and previous to his coming to the North-West had resided for many years in Fergus, Ont. He had arrived at the good old age of 73 years.

—LORLIE.

Seeding is now in full swing in this locality.

Prairie fires were raging here last Saturday and Sunday. The wind being very strong, the fire made great headway. Our popular magistrate swore in a special constable to call out the settlers to fight the fire, as the post office and fish market were in danger.

Our enterprising merchant has just received his spring goods, and has them now in full display.

Messrs. A. McKinley and J. Sanderson, of Indian Head, passed through here en route for Beaver Hills.

Mr. F. C. Temblett, one of our former settlers, who sold out and left for the Old Country last fall, has returned, thinking there are worse places than the North-West.

Mr. D. J. Cantelon, who has been visiting a friend in the German settlement (east of here), has returned, and has settled down again to business with renewed energies.

The cattle of this district have come out in fine condition this spring, especially the three and four-year-old steers.

Our young people are progressing favorably with their musical practice, but regret the absence of our violinist, the last two meetings his instrument being out of order.

Mr. E. Burdett, who has driven the mail between Pheasant Forks and Weyburn for the last three winters, leaves shortly for England. We wish him a pleasant voyage and safe return.

Seven farm hands passed through here on Saturday last from Saltcoats in search of employment.

INDIAN HEAD.

C. Andrews went east with a carload of cattle on Sunday night.

W. Sheppard, jr., of the C. A. F. Co., and Dominie McKay, of the Experimental Farm, bagged ten geese and two mallards as the result of one morning's early rising last week.

General Supt. Whyte, Assistant Supt. Milestone, of the C.P.R., and Mr. Jas. A. Whitelaw, merchant, Winnipeg, were guests at the Bell Farm this week. They departed Tuesday morning, their private car being attached to the east-bound train.

Another frame building is being erected on Main Street. It will be rented by the owner, Mr. C. Woods, to Mr. Sterling for a flour and feed business.

A. Davidson, of the Commercial, and G. C. Green left on Sunday afternoon for Fort Qu'Appelle, on a shooting expedition. They will be joined by Mr. Iredale, whose shooting box has been placed at their disposal.

"While some men talk other men work," and the truth of the saying is nowhere better illustrated than in the preparation for the season's operations noticeable at this point. Time and again the half informed writer and orator inveigh against the North-West Territories as a wheat producing area. They write and speak positively of "the shortness of the season," "the uncertainty of the crops," "the distance from the market," etc., etc. Now, while all this is under way, certain men of a practical stamp are imbued with the idea that wheat growing is not a back number, and that what other countries can do in the direction of producing cereals this locality can do, and do it a little better, and so the capitalist and private individual have gone on year after year, confidently breaking acre upon acre, until last season's shipment of grain from the C.P.R. station here up to the present date reaches over 500,000—an output which bids fair to be thrown into the shade by this time next year. Prominent among this *nit desperando* class of men has been Major Bell. His career has marked him as a man without fear of risk. And this spring he is as busy as ever on the Bell Farm. Nine drills are constantly at work seeding twenty acres daily, and wheat will be raised from between two and three thousand acres under cultivation. Mr. McLane, manager of the Sunbeam Farm, reports four hundred acres already seeded. The operations on the Canadian Alliance Farming Company's Farm have been retarded slightly by an insipid strike, which leaves the manager short handed at present, but the vacancies caused by leaving employees can easily be filled. The Experimental Farm has men, teams and machinery busily engaged, and other farmers around are well advanced with their season's work. Next week, however, for the benefit of the readers of the Progress, more perfect details will be collected, which will serve to emphasize the determination of the farmers operating at and the growing importance of this section.

Hotel Arrivals.

LELAND.

J. D. Brook, J. C. Gillespie, F. B. Neas, J. E. McAllister, F. W. Ford, J. A. Taylor, Fred. H. Stewart, W. Cavanagh, E. S. Hill, Winnipeg; J. G. Chaffin, Guelph; J. Stafford, Brantford; R. Baker, Woodstock; W. M. Child, J. H. Smith, D. F. Dickson, J. Rothwell, Mrs. A. A. Caruthers, Regina; David White, Montreal; A. E. Craig, Battleford; Dr. Kemp, Indian Head; R. Trumbell, Virden.

NEW SCHOOL INSPECTOR.

Mr. James A. Calder, B.A., of Moose Jaw, has received the appointment of School Inspector. Mr. Calder is a gold medalist, young and energetic and unmarried. He has for a number of years been principal of the Union School at Moose Jaw. In addition to his high educational qualifications, being an honor graduate of Manitoba University, Mr. Calder received a thorough training in the Normal School, Winnipeg, and is in all respects a first class practical teacher.

THE WORLD OVER.

A wheat crisis is threatened in Australia by over-production.

Protests have been entered against four members-elect of the Nova Scotia Legislature.

A doctor, just returned from New York, has been taken down with smallpox at Sussex, N.B.

The Evicted Tenants bill was introduced in the British Commons recently and passed its first reading.

Mello has abandoned the rebellion in Brazil for want of resources. He has found an asylum in Argentina.

The Newfoundland Government will send a petition to the Imperial Government to have the revenue act extended.

The Welland Canal is opened for the season.

Beeber and Co., private bankers, of Waterloo, Ont., have assigned.

A Berlin, Ont., man has been sentenced to life imprisonment for criminal assault on a five-year-old girl.

Bottled brandy and loaf sugar were discovered inside of unleavened bread imported into Toronto by a Hebrew. The customs effected a seizure.

RHEUMATISM CURED IN A DAY.—South American Rheumatic Cure for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. The first dose greatly benefits. 75 cents. Sold by C. E. Carthew, Qu'Appelle.

THE GREAT SOUTH AMERICAN NERVINE TONIC

AND STOMACH AND LIVER CURE

The Wonderful HEALTH BUILDER & NERVE FOOD

This Remedy cures Indigestion and Dyspepsia, as well as all Nervous Diseases, by acting on the Nerve Centres at the base of the brain. It has been absolutely demonstrated, that two-thirds of our diseases and ailments, are due to the deranged Nerve Centres at the base of or within the brain.

SOUTH AMERICAN NERVINE IS A WONDERFUL CURE FOR

INDIGESTION AND DYSPEPSIA.

Loss of Appetite, Weight and Tenderness in the Stomach, Sour Stomach Pain in the Stomach, Wind upon the Stomach, Nausea and Sick Stomach, Sick-Headache, Hiccough, Water Brash, Heartburn, Vertigo and Dizziness, Sleeplessness, Frightful Dreams, etc.

The Stomach suffers more than any of the other organs from disease, because into it are taken so many indigestible and irritating substances as articles of food. In its great effort to digest these, it soon becomes weakened and diseased. Under such circumstances, it is not wonderful that so many complain of indigestion and weak stomachs. When the stomach fails to digest and assimilate the food, the whole body falls into a state of weakness and decay. For Nature has decreed that the body must constantly receive nutriment through the stomach, to repair the waste of tissue constantly going on in the system.

The South American Nervine

Is probably the greatest remedy ever discovered for the cure of all Chronic Stomach troubles, because it acts through the nerve centres. It gives marked relief in ONE DAY, and very soon effects a permanent cure. The first bottle will convince anyone that a cure is certain.

WHAT EX-MEMBER OF PARLIAMENT, REUBEN E. TRUMAN, SAYS.

I have been for about ten years very much troubled with indigestion and dyspepsia, have used a great many different kinds of patent medicines, and have been treated by a number of physicians and found no benefit from them. I was recommended to try the SOUTH AMERICAN NERVINE. I obtained a bottle, and I found it very good, and very soon I was entirely free from my troubles, and would strongly recommend all my fellow sufferers from indigestion, to give the SOUTH AMERICAN NERVINE an immediate trial.

It will cure you.

July 16th, 1893.

(My signature) Reuben E. Truman

A MINISTER OF THE GOSPEL SPEAKS.

PATERBORO, Ontario, June 27th, 1893.

To the Proprietor of South American Nervine.

DEAR SIR,—I have much pleasure in recommending the great SOUTH AMERICAN NERVINE to all who are afflicted as I have been, with nervous prostration and indigestion. I found very great relief from the very first bottle, which was strongly recommended to me by my druggist. I also induced my wife to use it, who, I must say, was completely run down and was suffering very much from general debility. She found great relief from SOUTH AMERICAN NERVINE, and also cheerfully recommends it to her fellow sufferers.

(My signature) Rev W. S. Barker

Sick Headache

Is dependent on deranged nerve centres and indigestion. Hence its cure must come through building up the Nervous System and curing the Stomach. SOUTH AMERICAN NERVINE will absolutely cure this dreaded malady and prevent its return.

A SWORN CURE FOR ST. VITUS'S DANCE.

CRAWFORDVILLE, Indiana.

My daughter, twelve years old, had been afflicted for several months with St. Vitus's Dance. She was reduced to a skeleton, could not walk, could not talk, could not swallow anything but milk. I had to handle her like an infant. Doctors and neighbors gave up. I commenced giving her the SOUTH AMERICAN NERVINE Tonic, and the effects were very surprising. In three days she was rid of her nervousness, and rapidly improved. Four bottles cured her completely. I think the SOUTH AMERICAN NERVINE the greatest remedy ever discovered, and would recommend it to everyone. DESS, W. T. ENSMINGER, State of Indiana, 1893.

Subscribed and sworn to before me this May 19, 1893.

CHAS. M. TRAVIS, Notary Public.

PRICE, ONE DOLLAR.
